Seminar topic:

Digital-Safety: Maturing the cyber-security conversation from "Is this system secure?" to "Is this product safe?"

We've moved from a digitally-enabled society to a digitally-dependent one. More human interaction happens in the digital-realm than the physical. It's becoming impossible to purchase a modern household device or a new car or have any basic service without technology and AI embedded into it. Our job as cyber-professionals is rapidly morphing from "the protection of computers, data and networks" to "the protection of human safety in a tech-world," and I'm not convinced we're ready for that...

Presenter:

Andy Prow

Andy Prow is a cyber-security veteran with over 30 years in the industry. As a repeat tech-entrepreneur and an EY NZ Entrepreneur of Year Winner, Andy has founded 6 tech companies to date including Aura InfoSec and RedShield Security. He was inducted into the iSANZ "NZ Cyber-Security Hall of Fame 2023" and sits on the boards of the NZITF (NZ Internet Task Force), TechNZ, and the newly formed CyberTechNZ. Andy's passion, his PhD studies and his new company Qubit Cyber's mission is "keeping humans safe in a modern tech-world".
